👤 PROFILE

○ Experienced Web Developer adept in all stages of advanced web development. Proficient in an assortment of technologies including JavaScript, TypeScript, React, Bootstrap Framework, SCSS, and WCAG. Able to effectively self-manage during independent projects as well as collaborative in a team setting.

📁 EMPLOYMENT HISTORY

○ Front End Developer at Accenture Federal Services, Washington, D.C.

2022 - 2023

Implemented features for the USPS Click-n-Ship application using React and 3rd Party Zonos APIs that allowed users to see international taxes and fees as they created shipments and labels which improved the overall user experience

Employed AJAX and JSON technologies to create a seamless data exchange between the front-end and back-end

Handled testing guidelines and maintained features I created by fixing bugs and handling business team requests

○ Software Engineer at Rubenstein Technology Group, New York, NY

2014 - 2021

Built and launched websites on both WordPress and custom RubyLaw/Ruby-Content CMS

Worked with large scale, international law firm clients and upscale hotel brands

Modeled data via custom API end points to build front end templates in React

Transitioned front end development process from template based workflow to reusable component based workflow

Utilized a plurality of technologies such as React, Redux, and ElasticSearch to power custom search for AM Law 200 law firms

Implemented custom search recommendation engine for client which was GDPR compliant and based off anonymized search history

Created both a favicon generator via Gulp taskrunner and implemented iconfont process for all of our websites which reduced complexity of front end code and overall development time

Leveraged ElasticSearch, LogStash, and Kibana error logging to help squash bugs from our Quality Assurance team

EMPLOYMENT HISTORY CONTINUED

- Utilized Gitlab CI/CD pipeline for automated deployment
- Utilized Docker and Kubernetes (K8s) for running local app instances
- Transitioned Team from HTML/JS prototyped pages to Storybook reusable components which:
 - Sped up the early development timeline and reduced duplicate code
 - Allowed project managers and management to quickly view and collaborate on content and design earlier in the project
- **Web Developer at Big Idea Advertising, New York, NY**
2010 - 2014
 - Built and launched websites on the WordPress CMS platform
 - Converted PSD designs into custom responsive WordPress templates
 - Utilized APIs to add website features such as local weather, booking widgets, and social media integration
 - Improved company's SEO rank to the number 2 spot on search results homepage for targeted keywords through a combination of considered web copy, following latest SEO best practices, and improving the company's social media presence
- **Web Developer and Community Manager at Media Blasters, New York, NY**
2008 - 2010
 - Developed North American presence for the #1 online collectable card game in Japan, Alteil.
 - Maintained and fostered a thriving player community via or forums
 - Created a new achievement system with goals and rewards with a running cron which fired PHP scripts to validate when users met achievement qualifications

EDUCATION

- **Computer Science, Suffolk County Community College, Selden, NY**
- **Graphic Design, Pratt Institute, Brooklyn, NY**

EXTRACURRICULAR ACTIVITIES

- Currently running two video game podcasts in their seventh year
- Running home automations via Home Assistant on an RPi and am constantly tinkering making more complex and efficient actions
